

CURRICULUM VITAE

RUBEN SANTOS

Computer Engineer

HELLO

My name is Ruben Santos, born in 1992 and from Algarve, a region in the south of Portugal. I have studied computer engineer, and I work as a backend engineer. In my free time, I like to spend quality time with my family, read books, listen to music, and watch tv series.

Bachelor's degree
Computer Science

2014-2016 ○ **Instituto Superior Técnico**

Master's degree
Computer Science

SKILLS

DevOps/Server Development

AWS/GCP/Heroku/Packer
Terraform/Docker/Node/Rails

Client-Side Development

React/Redux

Database Management

Relational and Non-Relational

LIKES

Coffee

Read

Music

Pizza

WORK

2016-2017 ● **Backend Developer**

Startup Streamcato

Streamcato developed a similar application to Spotify. They received many songs and videos every day. I had to make sure the data was available on the different platforms, such as the dashboard and the mobile applications.

2017-2019 ○ **Fullstack Developer**

Startup Eleectro

Eleectro is an IoT startup focused on vending machines. I started as a backend developer where I ended up working most of the time creating API endpoints for both web and mobile applications. I also worked in the frontend, creating new sections on the dashboard.

2019-2020 ○ **Fullstack Developer**

Freelancing

I decided to take a break to focus on my projects. During this year, I have created several projects to improve my skills. The most significant applications were an online store and an app to help medical professionals fight covid.

2020-CURR ○ **Devops/Backend Developer**

Startup The Storefront

Storefront is what I like to call the "AirBnB" for companies. I am, along with the CTO, fully responsible for our backend. This includes managing the database, taking care of the DevOps pipeline, maintaining and developing our API, teaching new engineers, and making decisions.
